

Translogistics INC

VALUE-ADDED LOGISTIC SERVICES

Transforming Freight Programs. *One efficiency at a time.*

Dynamic Tracking

We integrate with carriers via EDI/API for auto load tendering and tracking with our team monitoring exceptions.

Your employees and your customers can/will receive text/email alerts related to shipments status upon request, or through TLI's Transportation Management System.

Carrier Monitoring

TLI's technology allows us to monitor new/existing carrier partners in real time to ensure all of our carriers are up-to-date with regulations and insurances.

TLI also keeps carrier scorecards with the following categories:

- On Time %
- Missed Pickups
- Late Deliveries
- EDI / API %
- Claims %

Contract Negotiations

We negotiate on behalf of your company to establish customer specific pricing tailored to your needs. Contracts are kept up-to-date and managed by TLI.

Contracts are held by TLI in our TMS system. All of your rates and contracts consolidated in one place.

Claim Mitigation

A dedicated claim management team led by experts. Our team takes on the burden of carrier damages and losses.

Not only will the team work through your claim, but provide insight on how to avoid future claims.

Account Management

A dedicated industry expert will be assigned to your account. This account manager will provide you with:

- Key Performance Indicators
- Strategies to enhance supply chain
- End of month reporting/analysis
- Business Reviews

Invoice Audits

Our team of auditors will audit each invoice to ensure proper charges and clients will receive one consolidated invoice weekly.

If continuous invalid charges occur, our team will dive in further to see how we can mitigate those costs.

Translogistics INC

Logistics. Made. Easy.
