- Demurrage dispatch calculations.
- Analysis of the full voyage results.
- Up to date market intelligence including port information.

| CARGO INSURANCE |

Cargo Insurance covers loss and/or damage of cargo while it is in transit between the points of origin and final destination. Goods may be transported by sea, air, or land. Cargo Insurance is essential for businesses engaging in international trade, especially those shipping large quantities of goods by boat. Specific terms and benefits vary widely across the world and many Cargo Insurance Policies are custom tailored for specific shipments, but a few general principles apply to the entire industry.

Different types of Cargo Insurance exist. Policies are available to protect the goods while in transit on the ship, but damage can occur while the ship is in port, while the goods are in transit to the warehouse or while at the warehouse itself.

Cargo Insurance Policies can be endorsed to cover all these instances, or a policy can be purchased individually to provide cumulative coverage for all locations of your goods.

OUR CUSTOMIZED SERVICES INCLUDE :-

- Customs clearance and documentation preparation
- Specialist staff for breakbulk, abnormal and oversize/overweight cargoes
- Packing, lashing and securing
- Freight insurance
- A strong international network of trusted shipping agents and freight forwarders

CROSS TRADE

Cross trade is the transportation of goods between two countries, outside the country of operation. We are able to handle complex cross trade shipments both in Sea and Air as well.

Globalisation of markets has promoted a growing trend towards integrated product supply between suppliers and their customers in international commercial operations.

This means that exporting companies have increased their acquisition of complementary components and articles in a variety of markets – in countries other than those of their production centres – which must all arrive at the customer's location at the same time in a coordinated manner. These products must therefore be managed using triangular or cross trade operations, without undergoing any further production processes and by necessity travelling over different routes.

OUR CUSTOMIZED SERVICES INCLUDE :-

- Customs clearance and documentation preparation
- Specialist staff for breakbulk, abnormal and oversize/overweight cargoes
- Packing, lashing and securing
- Freight insurance
- A strong international network of trusted shipping agents and freight forwarders

GLOBALLY CONNECTED, LOCALLY INVESTED.
